

Mantec's Diffusers for the Aquaculture Market

During the past 2 decades, Mantec has supplied around 300,000 ceramic diffusers to industry. These have chiefly been installed into the aquaculture industry and to waste water treatment works primarily to provide oxygen transfer and as a secondary function, to provide mixing.

The company manufactures ceramic media with particularly fine pore sizes. Due to a recent surge in demand from our customers for finer bubbles, Mantec has exploited this expertise to develop a new ceramic micro-bubble diffuser especially for the aquaculture sector.
