

Envicon EMR Membrane Tube Diffusers

Fittings and Spare Parts

ENVICON Double Adaptors EBA2

ENVICON adapters EBA2 for use in pairs for fastening tube diffusers are available for all tube types (square or round tube) and for all common tube sizes.

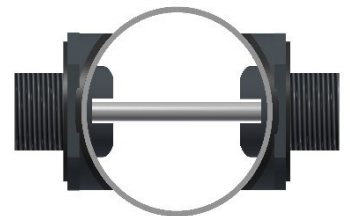

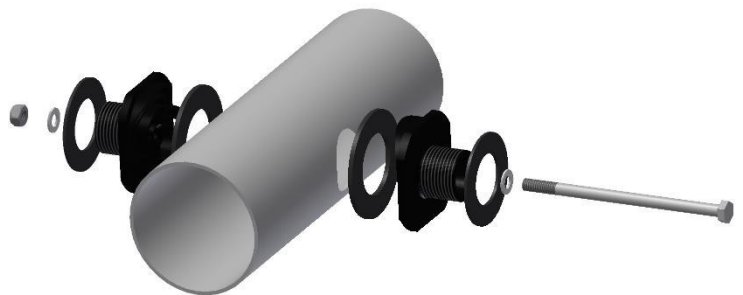

Adaptors EBA2 available for square tube:	From 80 x 40 mm
Adaptors EBA2 available for round tube:	DN50 to DN 150; oD63 to oD154

ENVICON adapters (here an example for round tube) can be quickly and easily installed on site. Only then are the diffusers screwed onto the adapters already installed.

On the renewal of the diffusers or only the membranes, the adapter can remain installed. As a consequence, re-fitting the diffusers is particularly easy. Renewed alignment and adjustment are not necessary.

The fastening of ENVICON membrane tube diffusers to plastic tubes is not recommended for stability reasons. Should this nevertheless occur, ENVICON will not provide any warranty for the fastening or accept any liability for any consequences that may result.

ENVICON single adapter EBA1 is available if it is required to install single tube diffusers; this adapter is also available for all tube types (square or round tube) and for all common tube sizes.

Replacement Membranes

All the membrane types and lengths stated above are of course also available as spare parts for all support tubes with an external diameter of 63 mm available on the market. The required clamps are also available.

Support Tube

Features:

- Shock-resistant and robust
- Particularly low pressure loss
- Hexagon on the head end for easier removal after extended operation
- End-side assembly tool for quickly unscrewing with the aid of power tools
- Can be used for the ENVICON adapter variants EBA and stainless steel connectors
- Longitudinal air passages and corresponding markings permit precise alignment of the unperforated strips over the outlets also on membrane replacement.

ENVICON support tubes have an R 1" female thread connection and can be installed with ENVICON adapters on all common square and round tube systems.
